

Key Information Document

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product

Product name: SEBI062W

ISIN: SE0010049775

Legal name: Skandinaviska Enskilda Banken AB (publ)

Call +46 771 62 10 00 for more information or visit www.sebgroup.com

Regulated by: Finansinspektionen, Box 7821, 103 97 Stockholm

Produced: 10/04/2018

You are about to purchase a product that is not simple and may be difficult to understand.

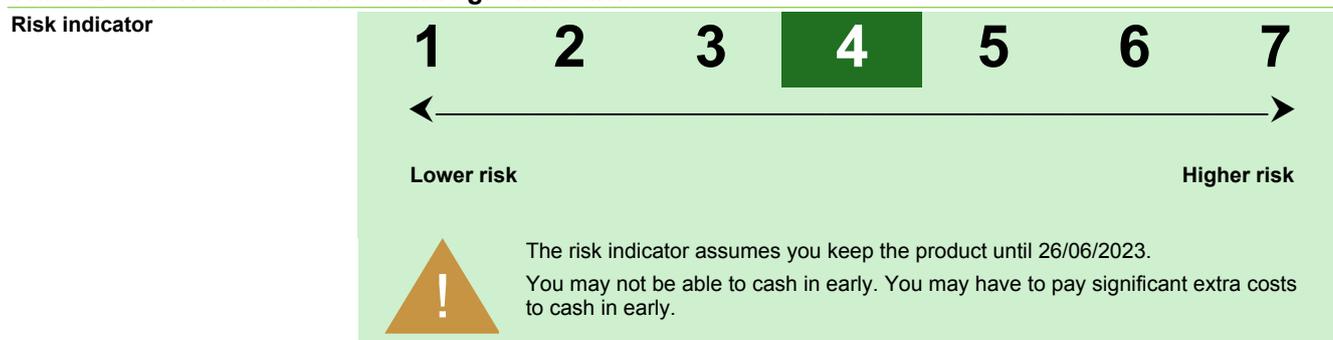

What is this product?

Type	Equity Linked Note
Objectives	<p>The return is linked to the positive performance of the underlying index with a participation. If the index performance is negative, but not lower than the barrier, a positive return equal to the negative index performance times a participation will be paid. The Nominal amount is not capital-protected. The Nominal amount is reduced by the full negative performance of the underlying asset if Risk barrier is reached on the Final observation date.</p> <p>The return is linked to the performance of the underlying asset. There is no currency risk in this product.</p> <p>Start value is calculated from the level of the underlying on the initial observation date. End value for calculating the return is taken as an arithmetic mean of final observations. End value for calculating redemption amount is taken from the official closing level of the underlying on the final observation date.</p>
Currency	SEK
Nominal Amount	10,000 SEK
Issue date	25/06/2018
Issue price	100 %
Participation ratio	130 %
Risk barrier	70.00 %
Underlying asset(s)	OMX Stockholm 40 EQW Excess return index
Initial observation date	08/06/2018
Observation period end date	Monthly, starting 07/06/2022 until 07/06/2023
Redemption Date	26/06/2023

Intended Retail Investor

The product SEBI062W is aimed at retail clients, who are interested in leveraged participation and income. The SEBI062W is a product for informed investors with average knowledge and/or experience with financial products. The investor is able to bear losses (up to the total loss of the investment amount) and puts no emphasis on capital protection. On a scale of risk ranging from 1 (security-oriented; very low to low return) to 7 (very high risk tolerance; highest return) the product SEBI062W falls in risk category 4.

What are the risks and what could I get in return?

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

You are entitled to receive back at least 100 % of your capital. Any amount over this, and any additional return, depends on future market performance and is uncertain.

If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

Investment 100,000 SEK		1 year	3 years	26/06/2023 (Recommended holding period)
Stress scenario	What you might get back after costs	SEK 36,954	SEK 48,044	SEK 34,509
	Average return each year	-63.05 %	-21.68 %	-19.16 %
Unfavourable scenario	What you might get back after costs	SEK 132,846	SEK 116,424	SEK 106,177
	Average return each year	32.85 %	5.20 %	1.21 %
Moderate scenario	What you might get back after costs	SEK 157,634	SEK 151,807	SEK 146,141
	Average return each year	57.63 %	14.93 %	7.88 %
Favourable scenario	What you might get back after costs	SEK 192,026	SEK 217,022	SEK 239,049
	Average return each year	92.03 %	29.47 %	19.03 %

This table shows the money you could get back until 26/06/2023, under different scenarios, assuming that you invest 100,000 SEK.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

This product cannot be easily cashed in. This means it is difficult to estimate how much you would get back if you cash in before the recommended holding period. You will either be unable to cash in early or you will have to pay high costs or make a large loss if you do so.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor.

The figures do not take into account your personal tax situation, which may also affect how much you get back.

* The calculation is based on Nominal Amount of the contract (in this example 100,000 SEK).

What happens if SEB is unable to pay out?

You are exposed to the risk that the issuer might be unable to fulfil its obligations in respect of the product, e.g. in the event of insolvency or an administrative order. The product is not covered by any deposit protection scheme. Thus, a total loss of your capital invested is possible.

What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest 100,000 SEK. The figures are estimates and may change in the future.

Costs over time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Investment 100,000 SEK	If you cash in after 1 year	If you cash in after 3 years	If you cash in at the recommended holding period
Total costs	SEK 7,000	SEK 7,000	SEK 6,500
Impact on return (RIY) per year	11.49 %	2.73 %	1.46 %

Composition of costs

The table below shows:

- The impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period.
- What the different cost categories mean.

This table shows the impact on return per year

One-off costs	Entry costs	1.46 %	The impact of the costs already included in the price.
	Exit costs	0.00 %	The impact of the costs of exiting your investment when it matures.
Ongoing costs	Portfolio transaction costs	0.00 %	The impact of the costs of us buying and selling underlying investments for the product.
	Other ongoing costs	0.00 %	The impact of the costs that we take each year for managing your investments.

How long should I hold it and can I take money out early?

The actual holding period can vary due to favourable/unfavourable market conditions and the leverage of your product. This product is designed for staying invested until maturity date.

This product cannot easily be cashed in. This means it is difficult to estimate how much you would get back if you sell before the recommended holding period/maturity. You will either be unable sell early or you may have to pay high costs or make a large loss if you do so.

How can I complain?

Any complaint regarding the product or the service received can be submitted on the following website <https://seb.se/kundservice/kundservice-privat/om-nagot-blivit-fel/klagomal> or be addressed in writing to: Kundrelationer, Bankärenden, SE-106 40 Stockholm.
