How are the net proceeds used by the Issuer?

The net proceeds of the issue will be used for funding purposes of the UBS Group and shall not be employed by the Issuer within Switzerland. The net proceeds from the sale of the Securities shall be employed by the Issuer for general business purposes. A separate ("special purpose") fund will not be established.

Are there any risks relating to the Issuer?

Potential investors in the Securities should be aware that, as with any company, there are general risks associated with the Issuer:

Each investor thus bears the general risk that the financial situation of the Issuer could deteriorate. Furthermore, the general assessment of the Issuer's creditworthiness may affect the value of the Securities. This assessment generally depends on the ratings assigned to the outstanding Securities of the Issuer or affiliated companies by rating agencies such as Moody's, Fitch and Standard & Poor's. The Issuer and affiliated companies may also participate in transactions that are related to the Securities, for their own account or for account of a client. Such transactions can have a negative effect on the price of the Securities.

When making decisions relating to investments in the Securities, **potential investors should consider all information contained in the Prospectus and, if necessary, consult their legal, tax or financial advisor.**

What are the Securities?

Under this Prospectus, UBS AG, acting through its London Branch, shall issue *UBS Gearing Certificates* with the *International Security Identification Number* (the "**ISIN**") as Issuer in accordance with German law. The Securities rank *pari passu* with all other direct, unsubordinated, unconditional and unsecured obligations of the Issuer.

All of the Securities are issued in uncertificated and dematerialised book-entry form, and registered at the *Clearing Agent* for clearance and settlement. No physical notes, such as global temporary or permanent notes or definitive notes will be issued in respect of the Securities.

The Securities are each based on the Index (the "**Underlying**").

How are the Securities offered?

Besides the filing of the Base Prospectus and the Final Terms with the BaFin, and the necessary publication as well as the necessary notification of the Base Prospectus, where required, neither the Issuer nor the Offeror has taken action, nor will they take action to render the public offer of the Securities or their possession, or the distribution of offer documents relating to the Securities, admissible in any other jurisdiction requiring special measures to be taken for the purpose of public offer.

Consequently, neither the Issuer nor the Offeror represents that the Securities may be lawfully offered, in compliance with any applicable registration or other requirements in any jurisdiction, or pursuant to an exemption available thereunder, or assumes any responsibility for facilitating any distribution or offering.

It has been agreed that, on or after the respective *Issue Date*, UBS Limited, 1 Finsbury Avenue, London EC2M 2PP, United Kingdom, shall underwrite the Securities by means of an underwriting agreement and shall place them for sale at the *Issue Price* under terms subject to change. The *Issue Price* was fixed at the *Start of public offer of the Securities*. After closing of the *Subscription Period* the selling price will then be adjusted on a continual basis to reflect the prevailing market situation.

The Offeror shall be responsible for coordinating the entire Securities offering and the Securities may be subscribed from the Offeror during normal banking hours within the *Subscription Period*.

Will the Securities be admitted to trading?

The Offeror intends to apply for inclusion of the Securities to trading on a *Security Exchange*.

Are there any restrictions on the sale of the Securities?

The Securities may only be offered, sold or delivered within or from a jurisdiction, provided that this is permissible under applicable laws and regulations and provided that the Issuer does not incur any further obligations. The Securities will, at no time, neither directly nor indirectly, be offered, sold, traded or delivered within the United States of America or to a U.S. person (as defined in the Regulation S under the United States Securities Act of 1933).

What does the Securityholder acquire from the Securities?

With the purchase of a (1) Security, the investor acquires the right, under certain conditions and as provided for in the Terms and Conditions of the Securities, to demand from the Issuer the payment of a *Redemption Amount* in the *Settlement Currency* depending on the performance of the *Underlying* (the "**Settlement Amount**") (the "**Security Right**").

The *Securityholders* shall not be entitled to any interim payments. None of the Securities vests a right to payment of fixed or variable interest or dividends and, as such, they **generate no regular income**.

Which risks are attached to an investment in the Securities?

An investment in the Securities carries product-specific risks for the investor. The value of a Security is determined not only by changes in the *Price of the Underlying*, but also depends upon a number of other factors. Accordingly, the value of the Securities may decline even if the *Price of the Underlying* remains constant. The Securities constitute investment instruments involving a particularly high degree of risk. As compared to other investments, Securities involve a substantial level of loss exposure, **including the total loss of the amounts invested, and transaction costs incurred**.

Prospective investors should note that changes in the *Price of the Underlying* on which the Security is based (or even the non-occurrence of anticipated price changes) can lower the value of a Security to the point that it no longer possesses any value. In light of the typically limited maturity of the Securities, there is no certainty that the value of the Security will recover before the Securities reach maturity. This risk is independent of the financial situation of the Issuer.

Prospective investors of the Securities should recognise that the Securities constitute a **risk investment** which can lead to a **total loss of their investment** in the Securities. Potential investors must therefore be prepared and able to sustain a partial or even a total loss of the invested capital. Any investors interested in purchasing the Securities should assess their financial situation, to ensure that they are in a position to bear the **risks of loss** connected with the Securities.

In addition to the *Term of the Securities*, the frequency and intensity of price fluctuations (volatility) in the *Underlying*, the prevailing interest rates and the level of dividends paid or, as the case may be, to the general development of foreign exchange markets, the following circumstances are, in the Issuer's opinion, the essential factors, which may have an impact on the value of the Securities and which may create certain risks for the investors in the Securities:

- **Features of the Security structure**

Prior to investing in the Securities, prospective investors should note that the following special features of the Securities may have an impact on the value of the Securities or, as the case may be, on any amount, if any, payable according to the Terms and Conditions and that the Securities accordingly have special risk profiles:

Extent of participation in the performance of the Underlying

The application of the *Participation Rate* within the determination of the Security Right results in the Securities being in economic terms similar to a direct investment in the *Underlying*, but being nonetheless

not fully comparable with such a direct investment, in particular because the *Securityholders* may not participate in the relevant performance by a 1:1 ratio, but by the proportion of the *Participation Rate*.

Accordingly the *Securityholder* participates in a **possible increase in the value** of the *Underlying* under proportionally only due to the lower proportion of the *Participation Rate* or, as the case may be, in a **possible decrease in the value** of the *Underlying* over proportionally due to the higher proportion of the *Participation Rate*.

Early Expiration of the Securities

Prospective investors should consider that the Securities may according to the Terms and Conditions and under certain circumstances expire prior to the *Expiration Date* without any statement by the Issuer or the *Securityholder* being required. In case the Securities expire prior to the *Expiration Date*, the *Securityholder* is entitled to demand the payment of an amount in relation to the early expiration. However, the *Securityholder* is not entitled to request any further payments on the Securities after the *Early Expiration Date*.

The *Securityholder*, therefore, bears the risk of not participating in the performance of the *Underlyings* to the expected extent and during the expected period.

In case of an early expiration of the Securities, the *Securityholder* also bears the so-called risk of reinvestment. The *Securityholder* may be able to re-invest any amount paid by the Issuer in case of an early expiration, if any, at market conditions, which might be less favourable than those existing prevailing at the time of the acquisition of the Securities.

- **Termination and Early Redemption at the option of the Issuer**

Potential investors in the Securities should furthermore be aware that the Issuer is at any time, *i.e.* even without the occurrence of a certain termination event, pursuant to the Terms and Conditions, entitled to terminate and redeem the Securities in total prior to the *Expiration Date*. In case the Issuer terminates and redeems the Securities prior to the *Expiration Date*, the *Securityholder* is entitled to demand the payment of an amount in relation to the early redemption. However, the *Securityholder* is not entitled to request any further payments on the Securities after the *Termination Date*.

The *Securityholder*, therefore, bears the risk of not participating in the performance of the *Underlying* to the expected extent and during the expected period and, therefore, receives less than its capital invested.

In case of a termination of the Securities by the Issuer, the *Securityholder* bears the risk of a reinvestment, *i.e.* the investor bears the risk that it will have to re-invest the *Termination Amount*, if any, paid by the Issuer in case of termination at market conditions, which are less favourable than those existing prevailing at the time of the acquisition of the Securities.

- **No termination right of the Securityholders**

The *Securityholders* do not have a termination right and the Securities may, hence, not be terminated by the *Securityholders* during their term. Prior to the maturity of the Securities the realisation of the economic value of the Securities (or parts thereof), if any, is, consequently and except for the Issuer's termination and early redemption, only possible by way of selling the Securities.

The selling of the Securities requires that market participants are willing to acquire the Securities at a certain price. In case that no market participants are readily available, the value of the Securities may not be realised. The Issuer is not obligated under the issuance of these Securities towards the *Securityholders* to compensate for or to repurchase the Securities.

- **Possible decline in the Price of the Underlying after termination of the Securities**

In the event that the *Term of the Securities* is terminated early by the Issuer pursuant to the Terms and Conditions of the Securities, potential investors of the Securities should note that any negative

performance of the *Price of the Underlying* between the announcement of the termination by the Issuer and the determination of the *Price of the Underlying* relevant for the calculation of the then payable *Termination Amount* are borne by the *Securityholders*.

- **Adverse impact of adjustments of the Security Right**

In case of the occurrence of a potential adjustment event, the Issuer shall be entitled to effect adjustments according to the Terms and Conditions. These adjustments might have a negative impact on the value of the Securities.

- **Other factors affecting the value**

The value of a Security is determined not only by changes in the *Price of the Underlying*, but also by a number of other factors. Since several risk factors may have simultaneous effects on the Securities, the effect of a particular risk factor cannot be predicted. In addition, several risk factors may have a compounding effect which may not be predictable. No assurance can be given with regard to the effect that any combination of risk factors may have on the value of the Securities.

- **Effect of ancillary costs**

Commissions and other transaction costs incurred in connection with the purchase or sale of Securities may result in charges, particularly in combination with a low order value, **which can substantially reduce any settlement amount, if any, to be paid under the Securities.** Before acquiring a Security, prospective investors should therefore inform themselves of all costs incurred through the purchase or sale of the Security, including any costs charged by their custodian banks upon purchase and maturity of the Securities.

- **Transactions to offset or limit risk**

Prospective investors of the Securities should not rely on the ability to conclude transactions at any time during the *Term of the Securities* that will allow them to offset or limit relevant risks. This depends on the market situation and the prevailing conditions. Transactions designed to offset or limit risks might only be possible at an unfavourable market price that will entail a loss for investors.

- **Trading in the Securities / Illiquidity**

It is not possible to predict if and to what extent a secondary market may develop in the Securities or at what price the Securities will trade in the secondary market or whether such market will be liquid or illiquid. **Potential investors therefore should not rely on the ability to sell Securities at a specific time or at a specific price.**

- **Representation and Custody of the Securities**

The Securities are issued by the Issuer in uncertificated and dematerialised book-entry form, and registered at the *Clearing Agent* for clearance and settlement. No physical notes, such as global temporary or permanent notes or definitive notes will be issued in respect of the Securities.

The Issuer has no responsibility or liability under any circumstances for any acts and omissions of the *Clearing Agent* as well as for any losses which might occur to a *Securityholder* out of such acts and omissions in general and for the records relating to, or payments made in respect of, beneficial interests of the *Securityholder*, in particular.

- **Pricing of Securities**

Unlike most other securities the pricing of these Securities is regularly not based on the principle of offer and demand in relation to Securities, since the secondary market traders might quote independent bid and offer prices. This price calculation is based on price calculation models prevailing in the market, whereas

the theoretical value of the Securities is, in principle, determined on the basis of the value of the *Underlying* and the value of other features attached to the Securities, each of which features may, in economic terms, be represented by another derivative financial instrument.

The potentially quoted prices do not necessarily correspond to the Securities' intrinsic value as determined by a trader.

- **Expansion of the spread between bid and offer prices**

In special market situations, where the Issuer is completely unable to conclude hedging transactions, or where such transactions are very difficult to conclude, the spread between the bid and offer prices may be temporarily expanded, in order to limit the economic risks to the Issuer. Therefore, *Securityholders* who wish to sell their Securities via a security exchange or in the over-the-counter trading might sell at a price considerably lower than the actual price of the Securities at the time of their sale.

- **Borrowed funds**

If the purchase of Securities is financed by borrowed funds and investors' expectations are not met, they not only suffer the loss incurred under the Securities, but in addition also have to pay interest on and repay the loan. This produces a substantial increase in investors' risk of loss. Investors of Securities should never rely on being able to redeem and pay interest on the loan through gains from a Securities transaction. Rather, before financing the purchase of a Security with borrowed funds, the investors' financial situations should be assessed, as to their ability to pay interest on or redeem the loan immediately, even if they incur losses instead of the expected gains.

- **The effect on the Securities of hedging transactions by the Issuer**

The Issuer may use all or some of the proceeds received from the sale of the Securities to enter into hedging transactions relating to the risks incurred in issuing the Securities. In such a case, the Issuer or one of its affiliated companies may conclude transactions that correspond to the Issuer's obligations arising from the Securities. Generally speaking, this type of transaction will be concluded before or on the *Issue Date* of the Securities, although these transactions can also be concluded after the Securities have been issued. The Issuer or one of its affiliated companies may at any time take the necessary steps for the closing out of any hedging transactions. It cannot be excluded that the *Price of the Underlying* might, in certain cases, be affected by these transactions.

- **Changes in Taxation in relation to the Securities**

The considerations concerning the taxation of the Securities set forth in this Prospectus reflect the opinion of the Issuer on the basis of the legal situation identifiable as of the date hereof. However, a different tax treatment by the fiscal authorities and tax courts cannot be precluded.

Therefore, it is expressly recommended that any potential investor familiarises himself with the specific risk profile of the product type described in this Prospectus and that any investor seeks the advice of a professional, if necessary. Potential investors are expressly made aware of the fact that the Securities constitute a **risk investment** which can lead to the **loss** of the invested capital. As a result, prospective investors must be prepared and able to accept a partial or even a total loss of the invested capital. Any investors interested in purchasing the Securities should assess their financial situation, to ensure that they are in a position to bear the **risks of loss** connected with the Securities.

RISK FACTORS

The different risk factors associated with an investment in the Securities issued within the framework of this Prospectus are outlined below. Which of these are relevant to the Securities described in this Prospectus depends upon a number of interrelated factors, especially the type of Securities and of the *Underlying*. Investments in the Securities should not be made until all the factors relevant to the Securities have been acknowledged and carefully considered. Terminology and expressions defined in the Terms and Conditions of the Securities shall have the same meaning when used herein. When making decisions relating to investments in the Securities, potential investors should consider all information contained in the Prospectus and, **if necessary, consult their legal, tax, financial or other advisor.**

I. ISSUER-SPECIFIC RISKS

General insolvency risk

Each investor bears the general risk that the financial situation of the Issuer could deteriorate. The Securities constitute immediate, unsecured and unsubordinated obligations of the Issuer, which, in particular in case of insolvency of the Issuer, rank *pari passu* with each other and all other current and future unsecured and unsubordinated obligations of the Issuer, with the exception of those that have priority due to mandatory statutory provisions.

Potentially significant litigation risks

The Issuer and other UBS Group companies operate in a legal and regulatory environment that exposes them to potentially significant litigation risks. As a result, UBS is involved in various disputes and legal proceedings, including litigation, arbitration, and regulatory and criminal investigations. Such cases are subject to many uncertainties, and their outcome often is difficult to predict, particularly in the earlier stages of a case. In certain circumstances, to avoid the expense and distraction of legal proceedings, UBS may based on a cost benefit analysis enter into a settlement even though UBS denies any wrongdoing. UBS Group makes provisions for cases brought against it only when after seeking legal advice, in the opinion of management, it is probable that a liability exists, and the amount can be reasonably estimated. No provision is made for claims asserted against UBS Group that in the opinion of management are without merit and where it is not likely that UBS will be found liable.

Effect of downgrading of the Issuer's rating

The general assessment of the Issuer's creditworthiness may affect the value of the Securities. This assessment generally depends on the ratings assigned to the Issuer or its affiliated companies by rating agencies such as Moody's, Fitch and Standard & Poor's.

Potential conflicts of interest

The Issuer and affiliated companies may participate in transactions related to the Securities in some way, for their own account or for account of a client. Such transactions may not serve to benefit the *Securityholders* and may have a positive or negative effect on the value of the *Underlying* and consequently on the value of the Securities. Furthermore, companies affiliated with the Issuer may become counterparties in hedging transactions relating to obligations of the Issuer stemming from the Securities. As a result, conflicts of interest can arise between companies affiliated with the Issuer, as well as between these companies and investors, in relation to obligations regarding the calculation of the price of the Securities and other associated determinations. In addition, the Issuer and its affiliates may act in other capacities with regard to the Securities, such as calculation agent, paying agent and administrative agent and/or index sponsor.

Furthermore, the Issuer and its affiliates may issue other derivative instruments relating to the *Underlying*; introduction of such competing products may affect the value of the Securities. The Issuer and its affiliated companies may receive non-public information relating to the *Underlying*, and neither the Issuer nor any of its

affiliates undertakes to make this information available to *Securityholders*. In addition, one or more of the Issuer's affiliated companies may publish research reports on the *Underlying*. Such activities could present conflicts of interest and may affect the value of the Securities.

Within the context of the offering and sale of the Securities, the Issuer or any of its affiliates may directly or indirectly pay fees in varying amounts to third parties, such as distributors or investment advisors, or receive payment of fees in varying amounts, including those levied in association with the distribution of the Securities, from third parties. Potential investors should be aware that the Issuer may retain fees in part or in full. The Issuer or, as the case may be, the Offeror, upon request, will provide information on the amount of these fees.

II. SECURITY-SPECIFIC RISKS

Investing in the Securities involves certain risks. Among others, these risks may take the form of equity market, bond market, foreign exchange, interest rate, market volatility and economic and political risks and any combination of these and other risks. The important risks are presented briefly below. Prospective investors should be experienced with regard to transactions in instruments such as the Securities and in the *Underlying*.

Prospective investors should understand the risks associated with an investment in the Securities and shall only reach an investment decision, after careful considerations with their legal, tax, financial and other advisors of (i) the suitability of an investment in the Securities in the light of their own particular financial, fiscal and other circumstances; (ii) the information set out in this document and (iii) the *Underlying*. An investment in the Securities should only be made after assessing the direction, timing and magnitude of potential future changes in the value of the *Underlying*, as the return of any such investment will be dependent, *inter alia*, upon such changes. More than one risk factor may have simultaneous effects with regard to the Securities, so that the effect of a particular risk factor is not predictable. In addition, more than one risk factor may have a compounding effect which may not be predictable. No assurance can be given with regard to the effect that any combination of risk factors may have on the value of the Securities.

Prospective investors of the Securities should recognise that the Securities may decline in value and should be prepared to sustain a **total loss** of their investment in the Securities. Potential investors must therefore be prepared and able to sustain a partial or even a **total loss** of the invested capital. Any investors interested in purchasing the Securities should assess their financial situation, to ensure that they are in a position to bear the **risks of loss** connected with the Securities.

The *Securityholders* shall not be entitled to any interim payments. None of the Securities vests a right to payment of fixed or variable interest or dividends and, as such, they **generate no regular income**. Therefore, potential reductions in the value of the Securities cannot be offset by any other income from the Securities.

It is expressly recommended that potential investors familiarise themselves with the specific risk profile of the product type described in this Prospectus and seek the advice of a professional, if necessary.

1. Entitlement under the Securities

With the purchase of a (1) Security, the investor acquires the right, under certain conditions and as provided for in the Terms and Conditions of the Securities, to demand from the Issuer the payment of a *Redemption Amount* in the *Settlement Currency* depending on the performance of the *Underlying* (the "**Settlement Amount**") (the "**Security Right**").

The *Securityholders* shall not be entitled to any interim payments. None of the Securities vests a right to payment of fixed or variable interest or dividends and, as such, they **generate no regular income**.

2. Features of the Security structure

Prior to investing in the Securities, prospective investors should note that the following special features of the Securities may have an impact on the value of the Securities or, as the case may be, on any amount, if any, payable according to the Terms and Conditions and that the Securities accordingly have special risk profiles:

Extent of participation in the performance of the Underlying

The application of the *Participation Rate* within the determination of the Security Right results in the Securities being in economic terms similar to a direct investment in the *Underlying*, but being nonetheless not fully comparable with such a direct investment, in particular because the *Securityholders* may not participate in the relevant performance by a 1:1 ratio, but by the proportion of the *Participation Rate*.

Accordingly the *Securityholder* participates in a **possible increase in the value** of the *Underlying* under proportionally only due to the lower proportion of the *Participation Rate* or, as the case may be, in a **possible decrease in the value** of the *Underlying* over proportionally due to the higher proportion of the *Participation Rate*.

Early Expiration of the Securities

Prospective investors should consider that the Securities may according to the Terms and Conditions and under certain circumstances expire prior to the *Expiration Date* without any statement by the Issuer or the *Securityholder* being required. In case the Securities expire prior to the *Expiration Date*, the *Securityholder* is entitled to demand the payment of an amount in relation to the early expiration. However, the *Securityholder* is not entitled to request any further payments on the Securities after the *Early Expiration Date*.

The *Securityholder*, therefore, bears the risk of not participating in the performance of the *Underlyings* to the expected extent and during the expected period.

In case of an early expiration of the Securities, the *Securityholder* also bears the so-called risk of reinvestment. The *Securityholder* may be able to re-invest any amount paid by the Issuer in case of an early expiration, if any, at market conditions, which might be less favourable than those existing prevailing at the time of the acquisition of the Securities.

3. Termination and Early Redemption at the option of the Issuer

Potential investors in the Securities should furthermore be aware that the Issuer is at any time, *i.e.* even without the occurrence of a certain termination event, pursuant to the Terms and Conditions, entitled to terminate and redeem the Securities in total prior to the *Expiration Date*. In case the Issuer terminates and redeems the Securities prior to the *Expiration Date*, the *Securityholder* is entitled to demand the payment of an amount in relation to the early redemption. However, the *Securityholder* is not entitled to request any further payments on the Securities after the *Termination Date*.

The *Securityholder*, therefore, bears the risk of not participating in the performance of the *Underlying* to the expected extent and during the expected period and, therefore, receives less than its capital invested.

In case of a termination the Issuer shall pay to each *Securityholder* an amount in the *Settlement Currency* with respect to each Security held by it, which is determined by the Issuer at its reasonable discretion pursuant to § 315 of the BGB and, if applicable, considering the then prevailing *Price of the Underlying* and the expenses of the Issuer caused by the termination, as the fair market price of a Security at the occurrence of the termination. When determining a fair market price of a Security, the Issuer is entitled to consider all factors, including any adjustments of option contracts on the *Underlying*, without being bound to any third party measures or assessments, in particular any measures or assessments of any futures or options exchange. Due to the fact that the Issuer may take into consideration the market factors it considers to be relevant at its reasonable discretion pursuant to § 315 of the BGB without being bound to third party measures or assessments, it can not be excluded that the amount determined by the Issuer at its reasonable discretion pursuant to § 315 of the BGB as the fair market price of the Security at the occurrence of the termination - and, hence, the *Termination Amount* - can differ from the market price of comparable Securities relating to the *Underlying* as determined by a third party.

In case of a termination of the Securities by the Issuer, the *Securityholder* bears the risk of a reinvestment, *i.e.* the investor bears the risk that it will have to re-invest the *Termination Amount*, if

any, paid by the Issuer in case of termination at market conditions, which are less favourable than those existing prevailing at the time of the acquisition of the Securities.

4. No termination right of the Securityholders

The *Securityholders* do not have a termination right and the Securities may, hence, not be terminated by the *Securityholders* during their term. Prior to the maturity of the Securities the realisation of the economic value of the Securities (or parts thereof), if any, is, consequently and except for the Issuer's termination and early redemption, only possible by way of selling the Securities.

The selling of the Securities requires that market participants are willing to acquire the Securities at a certain price. In case that no market participants are readily available, the value of the Securities may not be realised. The Issuer is not obligated under the issuance of these Securities towards the *Securityholders* to compensate for or to repurchase the Securities.

5. Possible decline in the Price of the Underlying after termination of the Securities

In the event that the *Term of the Securities* is terminated early by the Issuer pursuant to the Terms and Conditions of the Securities, potential investors of the Securities should note that any negative performance of the *Price of the Underlying* between the announcement of the termination by the Issuer and the determination of the *Price of the Underlying* relevant for the calculation of the then payable *Termination Amount* are borne by the *Securityholders*.

6. Adverse impact of adjustments of the Security Right

In case of the occurrence of a potential adjustment event, the Issuer shall be entitled to effect adjustments according to the Terms and Conditions. These adjustments might have a negative impact on the value of the Securities.

7. Other factors affecting the value

The value of a Security is determined not only by changes in the *Price of the Underlying*, but also by a number of other factors. Since several risk factors may have simultaneous effects on the Securities, the effect of a particular risk factor cannot be predicted. In addition, several risk factors may have a compounding effect which may not be predictable. No assurance can be given with regard to the effect that any combination of risk factors may have on the value of the Securities.

These factors include the *Term of the Securities*, the frequency and intensity of price fluctuations (volatility) in the *Underlying*, as well as the prevailing interest rate and dividend levels. A decline in the value of the Security may therefore occur even if the *Price of the Underlying* remains constant.

Prospective investors of the Securities should be aware that an investment in the Securities involves a valuation risk with regard to the *Underlying*. They should have experience with transactions in securities with a value derived from the respective *Underlying*. The value of the *Underlying* may vary over time and may increase or decrease by reference to a variety of factors which may include UBS corporate action, macro economic factors and speculation. If the *Underlying* comprises a basket of various assets, fluctuations in the value of any one asset may be offset or intensified by fluctuations in the value of other basket components. In addition, the historical performance of the *Underlying* is not an indication of its future performance. Changes in the market price of the *Underlying* will affect the trading price of the Securities, and it is impossible to predict whether the market price of the *Underlying* will rise or fall.

8. Effect of ancillary costs

Commissions and other transaction costs incurred in connection with the purchase or sale of Securities may result in charges, particularly in combination with a low order value, **which can substantially reduce any settlement amount, if any, to be paid under the Securities.** Before acquiring a

Security, prospective investors should therefore inform themselves of all costs incurred through the purchase or sale of the Security, including any costs charged by their custodian banks upon purchase and maturity of the Securities.

9. Transactions to offset or limit risk

Prospective investors of the Securities should not rely on the ability to conclude transactions at any time during the *Term of the Securities* that will allow them to offset or limit relevant risks. This depends on the market situation and the prevailing conditions. Transactions designed to offset or limit risks might only be possible at an unfavourable market price that will entail a loss for investors.

10. Trading in the Securities / Illiquidity

It is not possible to predict if and to what extent a secondary market may develop in the Securities or at what price the Securities will trade in the secondary market or whether such market will be liquid or illiquid.

If so specified in this Prospectus, applications will be or have been made to the *Security Exchange* specified for admission or listing of the Securities. If the Securities are admitted or listed, no assurance is given that any such admission or listing will be maintained. The fact that the Securities are admitted to trading or listed does not necessarily denote greater liquidity than if this were not the case. If the Securities are not listed or traded on any exchange, pricing information for the Securities may be more difficult to obtain and the liquidity of the Securities may be adversely affected. The liquidity of the Securities may also be affected by restrictions on the purchase and sale of the Securities in some jurisdictions. Additionally, the Issuer has the right (but no obligation) to purchase Securities at any time and at any price in the open market or by tender or private agreement. Any Securities so purchased may be held or resold or surrendered for cancellation.

In addition, it cannot be excluded that the number of subscribed Securities is less than the *Issue Size* of the Securities. There is the risk that due to the low volume of subscriptions in the Securities the liquidity of the Securities is lower than if all Securities were subscribed by investors.

The Offeror intends, under normal market conditions, to provide bid and offer prices for the Securities of an issue on a regular basis. However, the Offeror makes no firm commitment to the Issuer to provide liquidity by means of bid and offer prices for the Securities, and assumes no legal obligation to quote any such prices or with respect to the level or determination of such prices. **Potential investors therefore should not rely on the ability to sell Securities at a specific time or at a specific price.**

11. Representation and Custody of the Securities

The Securities are issued by the Issuer in uncertificated and dematerialised book-entry form, and registered at the *Clearing Agent* (as defined in the section entitled "Key Terms and Definitions of the Securities") for clearance and settlement. No physical notes, such as global temporary or permanent notes or definitive notes will be issued in respect of the Securities.

The Issuer has no responsibility or liability under any circumstances for any acts and omissions of the *Clearing Agent* as well as for any losses which might occur to a *Securityholder* out of such acts and omissions in general and for the records relating to, or payments made in respect of, beneficial interests of the *Securityholder*, in particular.

12. Pricing of Securities

Unlike most other securities the pricing of these Securities is regularly not based on the principle of offer and demand in relation to Securities, since the secondary market traders might quote independent bid and offer prices. This price calculation is based on price calculation models prevailing in the market, whereas the theoretical value of the Securities is, in principle, determined on the basis of the value of the *Underlying* and the value of other features attached to the Securities, each of which features may, in economic terms, be represented by another derivative financial instrument.

The potentially quoted prices do not necessarily correspond to the Securities' intrinsic value as determined by a trader.

13. Expansion of the spread between bid and offer prices

In special market situations, where the Issuer is completely unable to conclude hedging transactions, or where such transactions are very difficult to conclude, the spread between the bid and offer prices may be temporarily expanded, in order to limit the economic risks to the Issuer. Therefore, *Securityholders* who wish to sell their Securities via a security exchange or in the over-the-counter trading might sell at a price considerably lower than the actual price of the Securities at the time of their sale.

14. Borrowed funds

If the purchase of Securities is financed by borrowed funds and investors' expectations are not met, they not only suffer the loss incurred under the Securities, but in addition also have to pay interest on and repay the loan. This produces a substantial increase in investors' risk of loss. Investors of Securities should never rely on being able to redeem and pay interest on the loan through gains from a Securities transaction. Rather, before financing the purchase of a Security with borrowed funds, the investors' financial situations should be assessed, as to their ability to pay interest on or redeem the loan immediately, even if they incur losses instead of the expected gains.

15. The effect on the Securities of hedging transactions by the Issuer

The Issuer may use all or some of the proceeds received from the sale of the Securities to enter into hedging transactions relating to the risks incurred in issuing the Securities. In such a case, the Issuer or one of its affiliated companies may conclude transactions that correspond to the Issuer's obligations arising from the Securities. Generally speaking, this type of transaction will be concluded before or on the *Issue Date* of the Securities, although these transactions can also be concluded after the Securities have been issued. The Issuer or one of its affiliated companies may take the necessary steps for the closing out of any hedging transactions, on or prior to the relevant *Valuation Date*. It cannot be excluded that the *Price of the Underlying* might, in certain cases, be affected by these transactions. In the case of Securities whose value depends on the occurrence of a specific event in relation to the *Underlying*, entering into or closing out such hedging transactions may affect the likelihood of this event occurring or not occurring.

16. Changes in Taxation in relation to the Securities

The considerations concerning the taxation of the Securities set forth in this Prospectus reflect the opinion of the Issuer on the basis of the legal situation identifiable as of the date hereof. However, a different tax treatment by the fiscal authorities and tax courts cannot be precluded. In addition, the tax considerations set forth in this Prospectus cannot be the sole basis for the assessment of an investment in the Securities from a tax point of view, as the individual circumstances of each investor also have to be taken into account. Therefore, the tax considerations set forth in this Prospectus are not to be deemed any form of definitive information or tax advice or any form of assurance or guarantee with respect to the occurrence of certain tax consequences. Each investor should seek the advice of his or her personal tax consultant before deciding whether to purchase the Securities.

Neither the Issuer nor the Offeror assumes any responsibility vis-à-vis the *Securityholders* for the tax consequences of an investment in the Securities.

Neither this Prospectus, nor other information relating to the Securities represents an offer (in the legal sense) on the part of or on behalf of the Issuer or other persons, *i.e.* a subscription or purchase agreement relating to the Securities will not be effectively concluded with a unilateral declaration made on the part of or on behalf of the subscriber or investor to the Issuer or the Offeror.

TAX CONSIDERATIONS

1. **General information**

The following outline of the tax implications of investing in the Securities is based on the legislation prevailing at the time this Prospectus was prepared. Potential investors and sellers of the Securities should be aware that the tax implications may change due to any future amendments to the legislation. Although this outline reflects the Issuer's opinion of the tax implications, it must not be understood as a guarantee in an area that is not conclusively clarified.

Moreover, it must not provide the sole basis for assessing the tax implications of investing in the Securities, since the individual situation of the particular investor must also be taken into account. The outline is thus restricted to a general summary of the possible tax implications.

2. **Switzerland**

In Switzerland, where UBS AG, acting through its London Branch, 1 Finsbury Avenue, London EC2M 2PP, United Kingdom, as Issuer of the Securities, has its registered office (main offices: Zurich and Basel), the Securities are not subject to the Swiss withholding tax (Swiss withholding tax).

3. **Sweden**

Withholding tax

The following description of certain withholding tax issues that may arise as a result of holding the Securities is based on current Swedish tax legislation and is intended only as general information for Securityholders who are resident in Sweden for tax purposes as of the date of the Prospectus. This description does not deal comprehensively with all tax consequences that may occur for Securityholders, nor does it cover the specific rules regarding certain investors, including partnerships, investment companies, mutual funds and Securityholders with limited tax liability in Sweden. Investors are advised to consult their own tax advisors with regard to their personal tax implications resulting from an investment in the Securities.

Individuals resident in Sweden for tax purposes

Preliminary tax at a flat rate of 30 % is withheld by Euroclear Sweden AB, or a nominee in accordance with the Swedish Financial Instruments Act (1998:1479), on dividends paid to individuals (or an estate of a deceased individual) resident in Sweden for tax purposes.

Taxation of Swedish limited liability companies

For a limited liability company, all income, including taxable capital gains and dividends, is taxed as business income at a flat rate of 26.3 %.

Limited tax liability in Sweden

On dividends paid to Securityholders with limited tax liability in Sweden, Swedish withholding tax is payable at a flat rate of 30 %. The tax rate, however, is generally reduced by bilateral double tax treaties that Sweden has entered into. The deduction for withholding tax is normally carried out by Euroclear Sweden AB or, as the case may be, by the nominee. Most of the double tax treaties stipulate a reduction of the Swedish tax to the tax rate stipulated in the treaty. In case of a reduction, a refund may be claimed from the Swedish Tax Agency prior to the expiry of the fifth calendar year following the dividend distribution.

Investors are also advised to consult their own tax advisor with regard to their personal tax implications resulting from such an investment.

SELLING RESTRICTIONS

The distribution of this document and the offering of the Securities in certain jurisdictions may be restricted by law. Neither the Issuer nor the Offeror represents that this document may be lawfully distributed, or that the Securities may be lawfully offered, in compliance with any applicable registration or other requirements in any jurisdiction, or pursuant to an exemption available thereunder, or assumes any responsibility for facilitating any distribution or offering.

Unless expressly specified otherwise below, neither the Issuer nor the Offeror has taken action, nor will they take action to render the public offer of the Securities or their possession, or the distribution of offer documents relating to the Securities, admissible in any jurisdiction requiring special measures to be taken for this purpose. Accordingly, the Securities may not be offered or sold, directly or indirectly, and none of this document, any advertisement relating to the Securities and any other offering material may be distributed or published in any jurisdiction, except under circumstances that will result in compliance with any applicable laws and regulations. Persons into whose possession this document comes must inform themselves about, and observe, any such restrictions.

Public Offer of the Securities within the European Economic Area

Anyone who purchases the Securities is obliged and agrees never to publicly offer the Securities to persons in one of the member states of the European Economic Area that has implemented EU Directive 2003/71/EC (hereinafter the "**Prospectus Directive**"; the term also covers all implementation measures by member states of the European Economic Area), except in circumstances that comply with one of the following offerings of the respective Securities:

- (a) within the period which begins after the publication of the Base Prospectus which was approved in accordance with the Prospectus Directive, and, if necessary, for which cross-border validity pursuant to sections 17 and 18 of the Securities Prospectus Act has been granted, and which ends twelve months after publication of the Base Prospectus;
- (b) to legal entities which are authorised or regulated to operate in the financial markets, including: to credit institutions, investment firms, other authorised or regulated financial institutions, insurance companies, collective investment schemes and their management companies, pension funds and their management companies, commodity dealers, as well as entities that are not authorised or regulated whose corporate purpose is solely to invest in securities;
- (c) to other legal entities which meet two of the following three criteria: an average number of employees during the most recent financial year of more than 250, total assets exceeding EUR 43,000,000.00 and an annual net revenue of over EUR 50,000,000.00; all as stated in the most recent annual financial statements or consolidated accounts, or
- (d) other circumstances prevail whereby the publication of a Prospectus is not required pursuant to Article 3 of the Prospectus Directive.

The term "public offer of securities" in this context means any kind or means of communication to the public containing sufficient information relating to the offering conditions and the securities offered to put an investor in a position to decide whether to buy or subscribe to these securities. Anyone buying the Securities should note that the term "public offer of securities" may vary, depending on the implementation measures in the various member states of the European Economic Area.

In any member states of the European Economic Area which have not yet implemented the Prospectus Directive in national law, the Securities may only be offered or sold directly or indirectly, in accordance with prevailing legislation, to which dissemination and publication of the Prospectus, any advertising or other sales documents, is also subject.

United States of America

No Securities, or interest therein, may at any time be offered, sold, resold or delivered, directly or indirectly, in the United States or to or for the account or benefit of any U.S. person. The Securities may not be exercised or redeemed by or for the account of any U.S. Person or any person within the United States. As used herein, "**United States**" means the United States of America (including the States and the District of Columbia), its territories, its possessions and other areas subject to its jurisdiction, and "**U.S. person**" means (i) an individual who is a resident of the United States; (ii) a corporation, partnership or other entity organised in or under the laws of the United States or any political subdivision thereof or which has its principal place of business in the United States; (iii) any estate or trust which is subject to United States federal income taxation regardless of the source of its income; (iv) any trust if a court within the United States is able to exercise primary supervision over the administration of the trust and if one or more United States trustees have the authority to control all substantial decisions of the trust; (v) a pension plan for the employees, officers or principals of a corporation, partnership or other entity described in (ii) above; or (vi) any entity organised principally for passive investment, 10 % or more of the beneficial interests in which are held by persons described in (i) to (v) above if such entity was formed principally for the purpose of investment by such persons in a commodity pool the operator of which is exempt from certain requirements of Part 4 of the CFTC's regulations by virtue of its participants being non-U.S. persons; or (vii) any other U.S. person as such term may be defined in Regulation S under the United States Securities Act of 1933, as amended, or in regulations adopted under the United States Commodity Exchange Act.

UBS är, enligt egen uppfattning, ett av världens bäst kapitaliserade finansinstitut. Per den 30 juni 2009 var BIS Tier1²-ratio 13,2 % och uppgick investerade tillgångar till CHF 2 250 miljarder, kapitalet hänförligt till UBS:s aktieägare till CHF 33 545 miljoner och börsvärdet till CHF 42 872 miljoner.

Kreditvärderingsinstituten Standard & Poor's Inc. ("**Standard & Poor's**"), Fitch Ratings ("**Fitch**") och Moody's Investor Service Inc. ("**Moody's**") har bedömt UBS:s kreditvärdighet – d.v.s. UBS:s förmåga att i rätt tid fullgöra sina betalningsförpliktelser, såsom betalningar av kapital och ränta på långfristiga lån, så kallad skuldtjänst. Fitch och Standard & Poor's kan komplettera sina värderingar med ett plus- eller minustecken och Moody's med en siffra. Dessa tillägg indikerar den relativa positionen inom respektive kreditbetygsklass. Standard & Poor's sätter f.n. sin rating av UBS:s långfristiga upplåning med bättre rätt till A+, Moody's till Aa³ och Fitch till A+.

¹ Motsvarande heltid.

² Tier 1 kapital innefattar aktiekapital, aktieagio, balanserade vinstmedel inklusive innevarande års vinst, valutaomräkning och minoritetsintressen med avdrag för upplupna utdelningar, långa positioner i egna aktier netto och goodwill.

³ Den 15 juni 2009 satte Moody's sin rating av UBS:s långfristiga upplåning med bättre rätt under bevakning för eventuell nedgradering.

Hur använder Emittenten nettointäkterna?

Nettointäkterna av emissionen kommer UBS-koncernen att använda för finansieringsändamål och skall inte utnyttjas av Emittenten inom Schweiz. Nettointäkterna av försäljningen av Värdepapperen skall Emittenten ta i anspråk för allmänna affärsändamål. Någon separat fond ("för specialändamål") kommer inte att bildas.

Finns det några risker relaterade till Emittenten?

Presumptiva investerare i Värdepapperen bör vara medvetna om att det finns allmänna risker förenade med Emittenten, liksom med alla företag:

Varje investerare utsätter sig därför för den allmänna risken att Emittentens ekonomiska situation kan komma att försämrats. Vidare kan den allmänna bedömningen av Emittentens kreditvärdighet påverka Värdepapperens värde. Denna bedömning är generellt beroende av vilken kreditvärdering som värderingsinstitut såsom Moody's, Fitch och Standard & Poor's åsätter Emittentens eller närstående företags utestående Värdepapper. Emittenten och närstående företag kan också delta i transaktioner relaterade till Värdepapperen för egen eller kunders räkning. Sådana transaktioner kan ha positiv eller negativ inverkan på Värdepapperens pris.

Vid beslut om investeringar i Värdepapperen **bör presumtiva investerare bedöma all information i Prospektet och, om så erfordras, konsultera sina rådgivare i rättsliga, skatterelaterade eller ekonomiska frågor.**

Vilka är Värdepapperen?

I enlighet med detta Prospekt skall UBS AG, företrätt av sitt filialkontor i London, som Emittent i enlighet med tysk lag utfärda *UBS Gearing Certificates* med *Internationellt Värdepappersidentifikationsnummer ("ISIN")*. Värdepapperen rankas *pari passu* med Emittentens alla övriga direkta, ej efterställda, ej villkorliga och ej säkerställda förpliktelse.

Alla Värdepapper utfärdas i dokumentlös, kontoförd form och registreras hos *Clearingombudet* för clearing och avräkning. Inga skuldförbindelser i fysisk form, t.ex. globala temporära eller permanenta skuldförbindelser, eller individuella skuldförbindelser kommer att utfärdas för Värdepapperen.

Varje Värdepapper baseras på Index ("**Underliggande**").

Hur erbjuds Värdepapperen?

Utöver registrering av Basprospektet och de Slutliga Villkoren hos BaFin, och erforderligt offentliggörande och nödvändiga underrättelser om Basprospektet, om så erfordras, har varken Emittenten eller Erbjudaren vidtagit, och kommer inte heller att vidta, åtgärder så att det blir tillåtet att publikt erbjuda Värdepapperen eller att inneha dem eller att distribuera prospekt avseende Värdepapperen, i andra jurisdiktioner där särskilda förutsättningar gäller för publika erbjudanden.

Varken Emittenten eller Erbjudaren garanterar därför att Värdepapperen får lagligen erbjudas i enlighet med tillämplig registrering eller andra krav i någon jurisdiktion eller i enlighet med undantag som gäller i enlighet därmed, eller påtar sig något ansvar för att främja någon distribution eller något erbjudande.

Det har avtalats att UBS Limited, 1 Finsbury Avenue, London EC2M 2PP, UK, per eller efter respektive *Emissionsdatum* ("*Issue Date*") skall garantera Värdepapperen genom ett garantiavtal och skall erbjuda dem till försäljning till *Emissionspriset* ("*Issue Price*") i enlighet med villkor som kan förändras. *Emissionspriset* fastställdes när *det publika erbjudandet av Värdepapperen började gälla*. Efter utgången av Teckningstiden skall försäljningspriset löpande justeras för att avspegla den rådande marknadssituationen.

Erbjudaren ansvarar för att koordinera hela erbjudandet av Värdepapperen som kan tecknas hos Erbjudaren under normala bankköptider inom *Teckningstiden*.

Kommer Värdepapperen att upptas till handel?

Erbjudaren avser att ansöka om upptagande av Värdepapperen till handel på en *Fondbörs*.

Finns några restriktioner för försäljning av Värdepapperen?

Värdepapperen får erbjudas, säljas eller distribueras inom eller från en jurisdiktion endast om detta är tillåtet enligt gällande lagar och förordningar och under förutsättning att Emittenten inte ådrar sig ytterligare förpliktelser. Värdepapperen kommer inte att vid något tillfälle, vare sig direkt eller indirekt, att erbjudas, säljas, handlas eller distribueras inom USA eller till en U.S. person (enligt definitionen i Regulation S i United States Securities Act av 1933).

Vilka rättigheter förvärvar Värdepappersinnehavaren genom Värdepapperen?

Genom köpet av ett (1) Värdepapper förvärvar investeraren, under vissa förhållanden och i enlighet med Villkoren för Värdepapperen ("*Terms and Conditions of the Securities*"), rätten att från Emittenten fordra betalning av ett *Lösenbelopp* ("*Redemption Amount*") i *Avräkningsvalutan* ("*Settlement Currency*") beroende på resultatet för *Underliggande* ("**Avräkningsbeloppet**" ("*Settlement Amount*")) ("**Värdepappersrätten**" ("*Security right*")).

Värdepappersinnehavarna har inte rätt till delbetalningar. Inget av Värdepapperen ger någon rätt till betalning av fast eller rörlig ränta eller utdelning och **genererar som sådana ingen fast intäkt**.

Vilka risker är förenade med en investering i Värdepapperen?

En investering i Värdepapperen medför produktspecifika risker för investeraren. Värdet av ett Värdepapper bestäms inte enbart av förändringar i *Priset för Underliggande*, utan beror också av ett antal andra faktorer. Värdepapperens värde kan följaktligen sjunka även om *Priset för Underliggande* förblir konstant. Värdepapperen utgör investeringsinstrument med särskilt hög risk. Jämfört med andra investeringar medför Värdepapperen en avsevärd förlustexponering, **vilket inkluderar en total förlust av investerat belopp och uppkomna transaktionskostnader**.

Presumptiva investerare bör notera att förändringar i *Priset för Underliggande* som Värdepapperet baseras på (eller till och med uteblivna förväntade prisändringar) kan sänka värdet på ett Värdepapper till den punkt då det inte längre har något värde. Mot bakgrund av den i de flesta fall begränsade löptiden för Värdepapperen finns det inga garantier för att värdet på Värdepapperet återhämtar sig innan Värdepapperen förfaller. Denna risk är oberoende av Emittentens ekonomiska styrka.

Presumptiva investerare bör inse att Värdepapperen utgör en **riskinvestering** som kan leda till **total förlust av deras investering** i Värdepapperen. Presumptiva investerare måste därför vara beredda på och kunna bära en partiell eller till och med total förlust av investerat kapital. Varje investerare som är intresserad av att köpa Värdepapperen bör analysera sin ekonomiska situation för att försäkra sig om att han eller hon kan bära **riskerna för förlust i samband med Värdepapperen**.

Utöver *Värdepapperens Löptid*, frekvensen av och intensiteten i prisfluktuationerna (volatiliteten) i *Underliggande*, rådande räntesatser och nivån på de utdelningar som betalats eller, alltefter omständigheterna, valutamarknadernas allmänna utveckling är följande omständigheter, enligt Emittentens uppfattning, centrala faktorer som kan påverka Värdepapperens värde och skapa vissa risker för investerare i Värdepapperen:

- **Strukturella egenskaper hos Värdepapperet**

Före en investering i Värdepapperen bör presumptiva investerare observera att följande särskilda egenskaper hos Värdepapperen kan påverka Värdepapperens värde alternativt eventuella belopp som skall betalas enligt Villkoren och att Värdepapperen följaktligen har särskilda riskprofiler:

Graden av delaktighet i resultatet för Underliggande

Tillämpningen av *Deltagarandel* vid bestämningen av Värdepappersrätten leder till att Värdepapperen i ekonomiskt hänseende liknar direktinvesteringar i *Underliggande*, men ändå inte är helt jämförbara med sådana direktinvesteringar, främst för att *Värdepappersinnehavarna* kanske inte deltar i det aktuella resultatet i proportionerna 1:1, utan i den omfattning som motsvaras av *Deltagarandelen*.

Följaktligen blir *Värdepappersinnehavarens* delaktighet i en **eventuell värdeökning** i *Underliggande* proportionellt mindre, uteslutande på grund av den lägre *Deltagarandelen* eller, efter omständigheterna, i en **eventuell värdeminskning** i *Underliggande* proportionellt större, uteslutande på grund av den högre *Deltagarandelen*.

Förtida förfall av Värdepapperen

Presumptiva investerare bör beakta att Värdepapperen enligt Villkoren och under vissa omständigheter kan förfalla före *Förfalldatum* utan att meddelande från Emittenten eller *Värdepappersinnehavaren* erfordras. Om Certifikaten förfaller före *Förfalldatum* har *Värdepappersinnehavaren* rätt att begära betalning av ett belopp relaterat till att Certifikaten förfallit i förtid. *Värdepappersinnehavaren* har dock ingen rätt att begära ytterligare betalning avseende Certifikaten efter *Förtida Förfalldatum*.

Värdepappersinnehavaren bär därför risken för att inte delta i resultatet för *Underliggande* i förväntad utsträckning och under förväntad period.

Vid ett förtida förfall av Värdepapperen bär Värdepappersinnehavaren även den s.k. återinvesteringsrisken. *Värdepappersinnehavaren* kanske kan återinvestera eventuella belopp som utbetalas av Emittenten då Certifikaten förfaller i förtid till marknadsvillkor som är mindre gynnsamma än de som förelåg vid tiden för förvärvet av Värdepapperen.

- **Uppsägning och Förtida Inlösen efter Emittentens val**

Presumtiva investerare i Värdepapperen bör vidare vara medvetna om att Emittenten, när som helst, *d.v.s.* även om en viss uppsägningshändelse inte inträffar, enligt Villkoren har rätt att säga upp och lösa Värdepapperen i sin helhet före *Förfallobatum*. Om Emittenten säger upp och löser Värdepapperen före *Förfallobatum* har Värdepappersinnehavaren rätt att begära betalning av ett belopp för förtida inlösen. *Värdepappersinnehavaren* har dock ingen rätt att begära ytterligare betalning avseende Värdepapperen efter *Uppsägningsdatum*.

Värdepappersinnehavaren bär därför risken för att inte delta i resultatet för *Underliggande* i förväntad utsträckning och under förväntad period och därför erhålla mindre än investerat kapital.

Om Värdepapperen sägs upp av Emittenten bär *Värdepappersinnehavaren* risken för en återinvestering, *d.v.s.* investeraren bär risken för återinvestering av det eventuella *Uppsägningsbelopp* som betalas av Emittenten vid uppsägning till marknadsvillkor som är mindre gynnsamma än de som förelåg vid tiden för förvärvet av Värdepapperen.

- **Ingen uppsägningsrätt för Värdepappersinnehavarna**

Värdepappersinnehavarna har ingen uppsägningsrätt och Värdepapperen kan således inte sägas upp av *Värdepappersinnehavarna* under deras löptid. Före Värdepapperens förfallobdag är följaktligen en realisering av Värdepapperens eventuella ekonomiska värde (helt eller delvis), bortsett från Emittentens uppsägning och förtida inlösen, endast möjlig genom försäljning av Värdepapperen.

Försäljningen av Värdepapperen kräver att marknadsaktörerna är villiga att förvärva Värdepapperen till ett visst pris. Om inga marknadsaktörer finns till hands kan Värdepapperens värde kanske inte realiseras. Emittenten har enligt villkoren för emissionen av dessa Värdepapper ingen skyldighet gentemot *Värdepappersinnehavarna* att kompensera för eller återköpa Värdepapperen.

- **Eventuell nedgång i Priset för Underliggande efter uppsägning av Värdepapperen**

Om Emittenten säger upp Värdepapperen i förtid enligt Villkoren för Värdepapperen bör presumtiva investerare i Värdepapperen observera att risken för en eventuell negativ utveckling för *Priset för Underliggande* mellan Emittentens meddelande om uppsägning och fastställandet av det *Pris för Underliggande* som är relevant för beräkningen av då förfallet *Uppsägningsbelopp* bärs av *Värdepappersinnehavarna*.

- **Ogynnsam inverkan av justeringar i Värdepappersrätten**

Om en potentiell justeringshändelse inträffar skall Emittenten ha rätt att vidta justeringar enligt Villkoren. Dessa justeringar kan ha en negativ inverkan på Värdepapperens värde.

- **Andra faktorer som påverkar värdet**

Värdet av ett Värdepapper bestäms inte enbart av förändringar i *Priset för Underliggande*, utan beror också av ett antal andra faktorer. Eftersom flera riskfaktorer kan ha simultan effekt på Värdepapperen kan effekten av en viss riskfaktor inte förutses. Vidare kan flera riskfaktorer tillsammans ha en ackumulerad effekt som är oförutsägbar. Inga garantier kan lämnas för vilken inverkan olika kombinationer av riskfaktorer kan ha på Värdepapperens värde.

- **Effekten av sidokostnader**

Provisioner och andra transaktionskostnader som uppkommit i samband med köp eller försäljning av Värdepapper kan leda till avgifter, särskilt i kombination med ett lågt ordervärde, **vilket väsentligt kan minska eventuella avräkningsbelopp som skall erläggas enligt Värdepapperen.** Före förvärvet av ett Värdepapper bör presumtiva investerare därför informera sig om alla kostnader som uppkommer vid köp eller försäljning av Värdepapperet, inklusive kostnader som debiteras av deras depåbanker vid köpet av Värdepapperen och på Värdepapperens förfalldatum.

- **Transaktioner för att utjämna eller begränsa risk**

Presumtiva investerare i Värdepapperen bör inte förlita sig på möjligheten att vid någon tidpunkt under *Värdepapperens Löptid* genomföra transaktioner som medger utjämning eller begränsning av relevanta risker. Detta beror på marknadssituationen och rådande förhållanden. Transaktioner avsedda att utjämna eller begränsa risker kanske endast är möjliga till ett ogynnsamt marknadspris som innebär en förlust för investerarna.

- **Handel i Värdepapperen / Bristande likviditet**

Det är inte möjligt att förutsäga om och i vilken utsträckning en andrahandsmarknad utvecklas för Värdepapperen eller till vilket pris Värdepapperen kommer att handlas på andrahandsmarknaden eller om denna marknad kommer att vara likvid eller inte. **Presumtiva investerare bör därför inte förlita sig på möjligheten att sälja Värdepapperen vid en viss tidpunkt eller till ett visst pris.**

- **Värdepapperens form och förvar**

Värdepapperen som utfärdas av Emittenten är i dokumentlös, kontoförd form och registreras hos *Clearingombudet* för clearing och avräkning. Inga skuldförbindelser i fysisk form, såsom globala temporära eller permanenta skuldförbindelser, eller individuella skuldförbindelser kommer att utfärdas för Värdepapperen.

Emittenten har inte under några omständigheter något ansvar för *Clearingombudets* handlingar eller försummelser eller för förluster som åsamkas en *Värdepappersinnehavare* p.g.a. sådana handlingar eller försummelser i allmänhet eller för registreringar eller betalningar som gjorts med anledning av *Värdepappersinnehavarens* rätt i synnerhet.

- **Prissättning av Värdepapperen**

Till skillnad från flertalet andra värdepapper baseras prissättningen av dessa Värdepapper normalt inte på principen om utbud och efterfrågan av Värdepapperen eftersom mäklarna på andrahandsmarknaden kanske ställer oberoende köp- och säljpriser. Denna prissättning baseras på prisberäkningsmodeller som gäller på marknaden, medan det teoretiska värdet på Värdepapperen i princip bestäms på basis av värdet på *Underliggande* och värdet av andra egenskaper kopplade till Värdepapperen, där egenskaperna var för sig i ekonomiskt hänseende kan representeras av ett annat finansiellt derivatinstrument.

De potentiellt ställda priserna motsvarar inte nödvändigtvis Värdepapperens inneboende värde fastställt av en mäklare.

- **Ökning av spreaden mellan köp- och säljpriser**

I särskilda marknadssituationer där Emittenten är helt oförmögen att genomföra hedgingtransaktioner eller där sådana transaktioner är mycket svåra att genomföra, kan

spreaden mellan köp- och säljpriser temporärt ökas för att begränsa Emittentens ekonomiska risker. Därför kan *Värdepappersinnehavare* som önskar sälja sina Värdepapper via en fondbörs eller via OTC-handeln komma att sälja till ett pris som är avsevärt lägre än Värdepapperens faktiska pris vid tidpunkten för deras försäljning.

- **Lånade medel**

Om köpet av Värdepapper finansieras med lånade medel och investerarnas förväntningar inte infrias drabbas de inte bara av en förlust på grund av Värdepapperen utan måste även betala ränta och återbetala lånet. Detta medför en väsentlig ökning av investerarnas förlustrisk. Investerare i Värdepapper bör aldrig förlita sig på att kunna lösa och betala ränta på lånet med vinst av en Värdepapperstransaktion. Innan förvärvet av ett Värdepapper finansieras med lånade medel bör investerarna hellre analysera sin ekonomiska situation för att försäkra sig om sin förmåga att betala ränta på eller omedelbart lösa lånet även om de ådrar sig en förlust istället för den förväntade vinsten.

- **Effekten på Värdepapperen av Emittentens hedgingtransaktioner**

Emittenten kan använda alla eller vissa intäkter av försäljningen av Värdepapper för att ingå hedgingtransaktioner för risker ådragna vid emissionen av Värdepapperen. I så fall kan Emittenten eller något av dess närstående företag genomföra transaktioner som motsvarar Emittentens förpliktelser på grund av Värdepapperen. Generellt genomförs denna typ av transaktioner före eller per Värdepapperens *Emissionsdatum*, även om dessa transaktioner även kan slutföras efter att Värdepapperen utgivits. Emittenten eller något av dess närstående företag kan när som helst vidta nödvändiga åtgärder för att avsluta eventuella hedgingtransaktioner. Det kan inte utslutas att Priset för *Underliggande* i vissa fall skulle kunna påverkas av dessa transaktioner.

- **Ändringar i beskattningen av Värdepapperen**

De överväganden avseende beskattningen av Värdepapperen som anges i detta Prospekt avspeglar Emittentens uppfattning på basis av det identifierbara rättsläget per detta datum. En annan skattemässig behandling från skattemyndigheters och skattedomstolars sida kan dock inte utslutas.

Därför rekommenderas uttryckligen presumtiva investerare att informera sig om den specifika riskprofil för produkttypen som beskrivs i detta Prospekt och att investeraren vid behov söker professionell rådgivning. Presumtiva investerare uppmärksammas uttryckligen på det faktum att Värdepapperen utgör en **riskinvestering** som kan leda till **förlust** av investerat kapital. Presumtiva investerare måste därför vara beredda på och kunna bära en partiell eller till och med total förlust av investerat kapital. Varje investerare som är intresserad av att köpa Värdepapperen bör analysera sin ekonomiska situation för att försäkra sig om att han eller hon kan bära **riskerna för förlust i samband med Värdepapperen**.
