C.18	Return on derivative securities	<p>The interest amount (if any) due on each interest payment date is determined in accordance with the interest provisions as follows. If, in respect of an interest payment date,</p> <p>(a) an interest barrier event has not occurred, no amount in respect of interest will be paid on such interest payment date; or</p> <p>(b) an interest barrier event has occurred, the interest amount determined in accordance with the fixed rate note provisions set out below will be paid on such interest payment date.</p> <p>Definitions</p> <p><u>Dates</u></p> <p>An interest barrier observation date is,</p> <p style="padding-left: 40px;">in respect of an interest payment date, each date or dates specified as such for such interest payment date in the Table below (subject to adjustment – see "<i>Disrupted Days, Market Disruption Events and Adjustments</i>" below)</p> <p>An interest payment date is each date specified as such in the Table below.</p> <p>An interest valuation date is, in respect of an interest payment date, each date or dates specified as such for such interest payment date in the Table below (subject to adjustment – see "<i>Disrupted Days, Market Disruption Events and Adjustments</i>" below).</p> <p>The interest strike date(s) are each scheduled trading day for the interest underlying which is not a disrupted day for the interest underlying from (and including) 23 March 2018 to (and including) 23 April 2018 (subject to adjustment – see "<i>Disrupted Days, Market Disruption Events and Adjustments</i>" below).</p> <p><i>Definitions relating to the underlying(s) relevant for interest, the performance of such underlying(s) and levels of such underlying(s)</i></p> <p>An interest underlying means the or each underlying specified as an underlying for the purpose of the interest provisions in Element C.20 below.</p> <p>The interim performance underlying(s) for an interest payment date is,</p> <p style="padding-left: 40px;">as "worst of basket observation" applies and for the purpose of determining if an interest barrier event has occurred, the interest underlying with the first lowest (determined, if equal, by the calculation agent in accordance with the conditions) interim performance for that interest payment date.</p> <p>The interim performance in respect of an interest payment date shall be determined in accordance with the</p>

"worst of basket observation" provisions for the purpose of determining if an interest barrier event has occurred, meaning that the interim performance in respect of an interest underlying and an interest payment date is, in the determination of the calculation agent, an amount expressed as a percentage equal to such interest underlying's interest reference level for that interest payment date less its interest strike level, all divided by its interest initial level, expressed as a formula:

$$\frac{\text{interest reference level for such interest payment date} - \text{interest strike level}}{\text{interest initial level}}$$

The **interest strike level** for an interest underlying is, in respect of an interest payment date, the level specified for such interest underlying in the Table below.

The **interest reference level** means, in respect of an interest valuation date or, as the case may be, interest valuation dates, the related interest payment date and the or each interest underlying:

for the purpose of determining if an interest barrier event has occurred "closing level on interest valuation date", being the underlying closing level for such interest underlying for the relevant interest valuation date.

The **interest initial level** means, in respect of an interest valuation date or, as the case may be, interest valuation dates, the related interest payment date and the or each interest underlying:

for the purpose of determining if an interest barrier event has occurred "lowest closing level on interest strike dates", being the lowest underlying closing level for such interest underlying for the relevant interest strike dates.

Definitions relating to the determination of an interest barrier event

An **interest barrier event** will occur in respect of an interest payment date if, in the determination of the calculation agent,

on the related interest barrier observation date, the underlying closing level of the interim performance underlying (the **interest barrier underlying(s)**) is within the relevant interest barrier level (**interest barrier event european closing observation**)

The **interest barrier level** is, in respect of an interest payment date,

the percentage(s) specified in relation to the relevant interest barrier underlying for such interest payment date in the Table below.

Definitions relating to the determination of the amount of interest due on an interest payment date

The **interest amount determined in accordance with the fixed rate note provisions**, means that the interest amount in respect of each calculation amount, an interest payment date and if due as provided above, is fixed interest and will be:

as "accrual" is not applicable, the relevant amount specified

for such interest payment date in the Table below.

SECTION D – RISKS

Element	Title	
D.2	Key risks regarding the Issuers	<p>There are certain factors that may affect CGMFL's ability to fulfil its obligations under the Notes issued by it, including that such ability is dependent on the group entities to which it on-lends and funds raised through the issue of the Notes performing their obligations in respect of such funding in a timely manner. In addition, such ability and CGMFL's ability to fulfil its obligations as guarantor in respect of Notes issued by CGMFL is dependent on economic conditions, credit, market and market liquidity risk, by competition, country risk, operational risk, fiscal and monetary policies adopted by relevant regulatory authorities, reputational and legal risks and certain regulatory considerations.</p>
D.3	Key risks regarding the Notes	<p>Investors should note that the Notes (including Notes that are expressed to redeem at par or above) are subject to the credit risk of CGMFL and CGML. Furthermore, the Notes may be sold, redeemed or repaid early, and if so, the price for which a Note may be sold, redeemed or repaid early may be less than the investor's initial investment. There are other certain factors which are material for the purpose of assessing the risks associated with investing in any issue of Notes, which include, without limitation, (i) risk of disruption to valuations, (ii) adjustment to the conditions, substitution of the relevant underlying(s) and/or early redemption following an adjustment event or an illegality, (iii) postponement of interest payments and/or minimum and/or maximum limits imposed on interest rates, (iv) cancellation or scaling back of public offers or the issue date being deferred, (v) hedging activities of the Issuer and/or any of its affiliates, (vi) conflicts of interest between the Issuer and/or any of its affiliates and holders of Notes, (vii) modification of the terms and conditions of Notes by majority votes binding all holders, (viii) discretions of the Issuer and Calculation Agent being exercised in a manner that affects the value of the Notes or results in early redemption, (ix) change in law, (x) payments being subject to withholding or other taxes, (xi) fees and commissions not being taken into account when determining secondary market prices of Notes, (xii) there being no secondary market, (xiii) market value of Notes being affected by various factors independent of the creditworthiness of CGMFL and CGML such as market conditions, interest and exchange rates and macro-economic and political conditions and (xiv) credit ratings not reflecting all risks.</p> <p>See also Element D.6 below</p>
D.6	Key risks regarding the Notes and risk warning	<p>INVESTORS MAY LOSE THEIR ENTIRE INVESTMENT OR PART OF IT AS THE CASE MAY BE. CGMFL DOES NOT REPRESENT THAT THE LIST BELOW IS COMPREHENSIVE. PROSPECTIVE INVESTORS SHOULD READ THE BASE PROSPECTUS IN ITS ENTIRETY AND FORM THEIR OWN CONCLUSIONS REGARDING CGMFL.</p> <p>An investment in Notes may entail significant risks and risks that are not associated with an investment in a debt instrument with a fixed principal amount and which bears interest at either a fixed rate or at a floating rate determined by reference to published interest rate references. The risks of a particular Note will depend on the terms of such Note, but may include, without limitation, the possibility of significant changes in the prices of the relevant Underlying(s). Such risks generally depend on factors over which none of the relevant Issuer and, where the relevant Issuer is CGMHI, the CGMHI Guarantor or where the relevant Issuer is CGMFL, the CGMFL Guarantor, has control and which cannot readily be foreseen, such as economic and</p>

		<p>political events and the supply of and demand for the relevant Underlying(s). In recent years, currency exchange rates and prices for various Underlying(s) have been highly volatile, and such volatility may be expected in the future. Fluctuations in any such rates or prices that have occurred in the past are not necessarily indicative, however, of fluctuations that may occur during the term of any Note. The risk of loss as a result of the linkage to the relevant Underlying(s) can be substantial. Investors should note that their investment in Notes, may expose them to payments and/or deliveries which is/are determined by reference to one or more values of security indices, inflation indices, commodity indices, commodities, shares, depositary receipts, exchange traded funds, mutual funds, currencies, warrants, proprietary indices (which may be linked or referenced to one or more asset classes), dividend futures contracts, interest rates or other bases of reference of formulae (the Underlying(s)), either directly or inversely, and for physically settled Notes this may result in the Notes being redeemable for certain assets.</p>

DEL D – RISKVARNING

Faktor	Benämning	
D.2	Risikfaktorer avseende Emittenten	Det finns vissa faktorer som kan komma att påverka CGFML:s förmåga att uppfylla sina åtaganden rörande de utfärdade Skuldebreven, innefattande att sådan förmåga är beroende av att de entiteter inom gruppen, vilka det lånar ut till och finansierar genom utfärdandet av Skuldebreven, fullgör sina skyldigheter i förhållande till sådan finansiering i tid. Därtill är CGFML:s förmåga att uppfylla sina åtaganden som Garantigivare av Skuldebreven beroende av ekonomiska förhållanden, kredit-, marknads- och likviditetsrisk, av konkurrens, risk förknippad med olika länder, operationell risk, skatt- och penningbestämmelser antagna av de relevanta regulatoriska myndigheterna, ryktesrisk och juridiska risker samt vissa regulatoriska aspekter.
D.3	Risikfaktorer avseende Skuldebreven	Investerare bör notera att Skuldebreven (inklusive Skuldebrev som uttryckligen ska inlösas pari) är utsatta för kreditrisken för CGMFL och CGML. Dessutom kan Skuldebreven säljas, lösas in eller återbetalas i förtid och om så sker kan priset på Skuldebreven vara lägre än investerarens initiala investering. Det finns vissa andra faktorer som är väsentliga för att bedöma risken som associeras med en investering i Skuldebreven, vilket inkluderar utan begränsning, (i) risken för avbrott i värderingen, (ii) justeringar av villkoren av utbytande av underliggande och/eller förtida inlösen till följd av en justeringshändelse eller olaglighet, (iii) försening av räntebetalningar och/eller minimum och/eller maximal av räntenivån, (iv) upphävande eller minskning av offentliga erbjudanden eller emissionsdagar som skjuts upp, (v) hedging av Emittenten och/eller dess närstående bolag, (vi) intressekonflikt mellan Emittenten och/eller dess närstående bolag och aktieägarna till Skuldebreven, (vii) förändringar i villkoren för Skuldebreven genom majoritetsbeslut som binder alla aktieägare, (viii) beslut av Emittenten och Beräkningsagenten som påverkar värdet på Skuldebreven eller resulterar i förtida inlösen, (ix) lagförändringar, (x) betalningarna kan vara beroende av att innehålla skatt, (xi) avgifter och kommission som inte räknas in vid bedömningen av sekundärpriset på Skuldebreven, (xii) att det inte finns någon sekundär marknad, (xiii) marknadsvärdet på Skuldebreven kan påverkas av olika faktorer oberoende

D.6	Riskfaktorer avseende Skuldebreven och riskvarning	<p>INVESTERARE KAN FÖRLORA HELA ELLER DELAR AV SITT INVESTERADE KAPITAL. CGMFL FRAMSTÄLLER INTE ATT LISTAN NEDAN ÄR UTTÖMMANDE. POTENTIELLA INVESTERARE BÖR LÄSA GRUNDPROSPEKTET I DESS HELHET OCH FORMA EN EGEN SLUTSATS AV CGMFL.</p> <p>En investering i Skuldebrev kan innebära betydande risker och risker som inte associeras med en investering i skuldebrev med fast kapitalbelopp och som bär antingen bunden ränta eller rörlig ränta som bestäms i referens i förhållande till offentliggjorda räntesatser. Riskerna med ett särskilt Skuldebrev beror på dess villkor, men kan inkludera, utan begränsningar, möjligheten till väsentlig förändring i priset av de relevanta underliggande tillgångarna. Sådana risker beror allmänt på faktorer som ingen av de relevanta Emittenterna, då den relevanta emittenten är CGMFL, CGMFL:s Garantigivare eller då den relevanta emittenten är CGMFL, CGMFL:s Garantigivare, kan kontrollera eller förutse, såsom ekonomiska och politiska händelser och leverans eller krav på de relevanta underliggande tillgångarna. Under senare år har valutakurser och priser på åtskilliga underliggande tillgångar varit mycket rörliga och sådan rörlighet förväntas även i framtiden. Fluktuationer i kurser eller priser som inträffat tidigare behöver dock inte nödvändigtvis vara indikativa för fluktuationer som kan komma att inträffa under ett Värdepappers löptid. Risken för förlust som är ett resultat av kopplingen mellan det/de aktuella underliggande tillgångarna kan vara betydande. Investerarare bör notera att deras investering i Skuldebreven kan exponera dem mot betalningar och/eller leveranser som bestäms med hänvisnings till en eller flera värden hos olika värdepappersindex, inflationsindex, tillgångsindex, tillgångsandelar, depositionsbevis, börshandlade fonder, fonder, valutor, varranter, ägandeindex (vilken kan vara kopplad eller hänvisad till en eller flera tillgångsklasser), terminskontrakt, räntor och andra referensvärden (Underliggande tillgångar) antingen direkt eller omvänt, och för Skuldebrev som avvecklas fysiskt kan detta leda till att Skuldebreven blir inlösningsbara för vissa tillgångar.</p>
